

Virus detail	
Virus name:	hCoV-19/Australia/NSW4490/2021
Accession ID:	EPI_ISL_1672851
Type:	betacoronavirus
Clade	GH
Pango Lineage	B.1.466.2 (version: 2021-04-14)
AA Substitutions	Spike D614G, Spike G232V, Spike N439K, Spike P681R, N A182S, N D144Y, N T205I, NS3 Q57H, NS8 A51V, NSP1 H110Y, NSP2 L567F, NSP3 P822L, NSP3 S126L, NSP3 T350I, NSP6 L75F, NSP12 P323L, NSP13 S259L
Variant	
Passage details/history:	Original
Sample information	
Collection date:	2021-04-19
Location:	Oceania / Australia / New South Wales / Sydney
Host:	Human
Additional location information:	
Gender:	unknown
Patient age:	30
Patient status:	unknown
Specimen source:	
Additional host information:	
Sampling strategy:	
Outbreak:	
Last vaccinated:	
Treatment:	
Sequencing technology:	Oxford Nanopore MinION
Assembly method:	
Coverage:	
Comment:	
Institute information	
Originating lab:	Area of Virology, Serology and Virology Division (SAViD), New South Wales Health Pathology Randwick
Address:	Prince of Wales Hospital, Barker Street, Randwick, NSW 2031
Sample ID given by the originating laboratory:	nCoV_2490
Submitting lab:	Virology Research Laboratory; Area of Virology, Serology and Virology Division (SAViD), New South Wales Health Pathology Randwick
Address:	Prince of Wales Hospital, Barker Street, Randwick, NSW 2031
Sample ID given by the submitting laboratory:	nCoV_2490
Authors:	Foster, C.; Au, J.; Ruiz Silva, M.; Deveson, I.; Bull, R.; Van Hal, S.; Rawlinson, W.
Submitter information	
Submitter:	Foster, Charles
Submission Date:	2021-04-22
Address:	

Important note: In the GISAID EpiFlu™ Database Access Agreement, you have accepted certain terms and conditions for viewing and using data regarding influenza viruses. To the extent the Database contains data relating to non-influenza viruses, the viewing and use of these data is subject to the same terms and conditions, and by viewing or using such data you agree to be bound by the terms of the GISAID EpiFlu™ Database Access Agreement in respect of such data in the same manner as if they were data relating to influenza viruses.
